How it was supported

What the customer really needed

We have strong opinions about our tools because we know what they should be doing for us

So we want an editor that ...

So we want an editor that ...

Is accessible from anywhere

From home to work to phone

So we want an editor that ...

Is accessible from anywhere

From home to work to phone

Is as simple to use as Textmate

Listen to users, but find the best way to do things

So we want an editor that ...

Is accessible from anywhere
From home to work to phone

Is as simple to use as Textmate
Listen to users, but find the best way to do things

Is fast even though it is on the Web
Performance, performance, performance

So we want an editor that ...

Is accessible from anywhere
From home to work to phone

Is as simple to use as Textmate
Listen to users, but find the best way to do things

Is fast even though it is on the Web
Performance, performance, performance

Collaborates like SubEthaEdit
It just does what you expect

So we want an editor that ...

Is accessible from anywhere
From home to work to phone

Is as simple to use as Textmate
Listen to users, but find the best way to do things

Is fast even though it is on the Web
Performance, performance, performance

Collaborates like SubEthaEdit
It just does what you expect

Has a command line like Vi
Quicksilver for code

So we want an editor that ...

Is accessible from anywhere
From home to work to phone

Is as simple to use as Textmate
Listen to users, but find the best way to do things

Is fast even though it is on the Web
Performance, performance, performance

Collaborates like SubEthaEdit
It just does what you expect

Has a command line like Vi
Quicksilver for code

Is self-hosted like Emacs
But using JavaScript, our platform

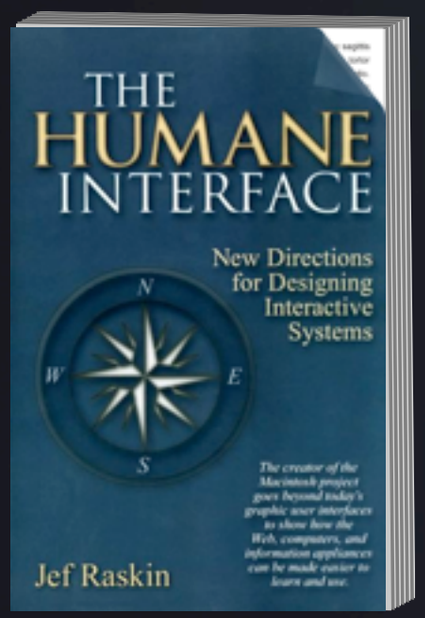
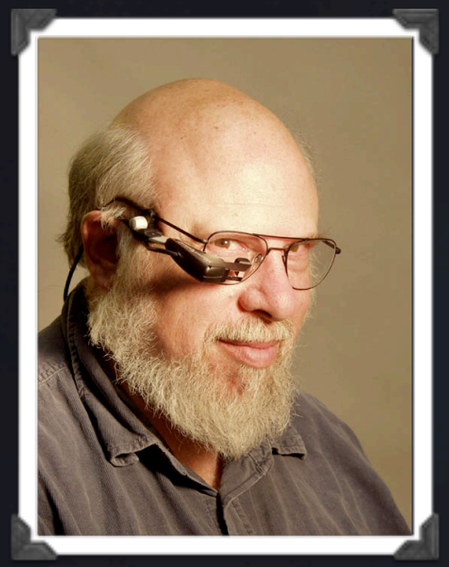
Jef Raskin
Usability Expert

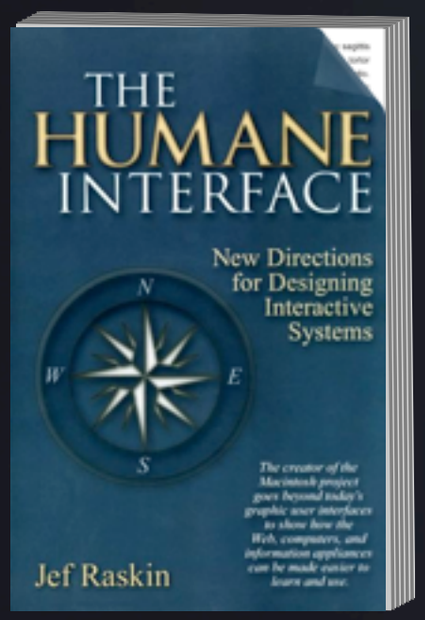


Before *doing user research*, interface designers *should* exploit what is common to all humans with regards to interface design

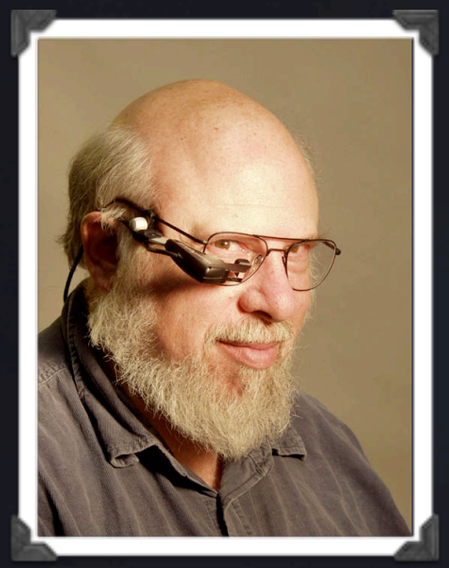


Jef Raskin

Usability Expert



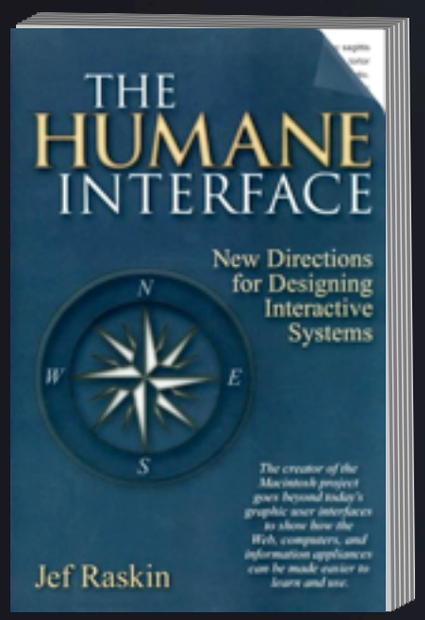
Universal psychological facts

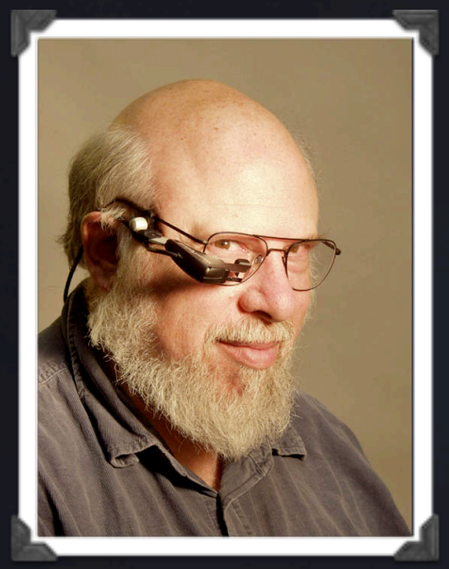


Jef Raskin

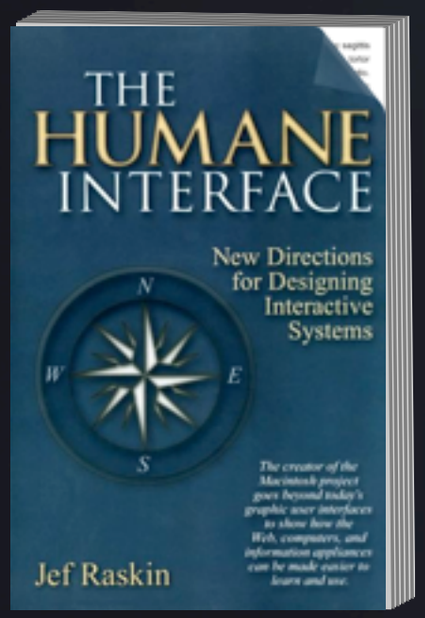
Usability Expert

The quality of any *software* is ultimately determined by the quality of the interaction between one human and one system

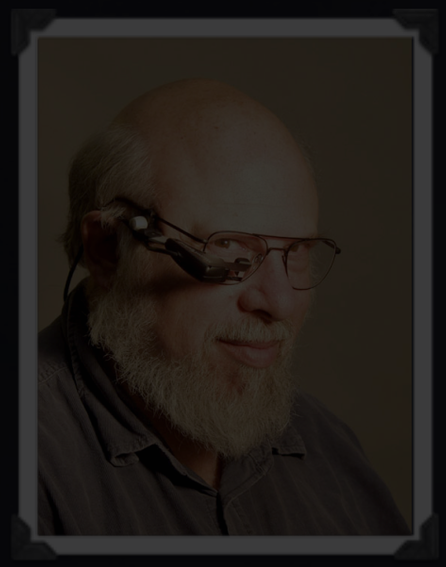




Jef Raskin
Usability Expert



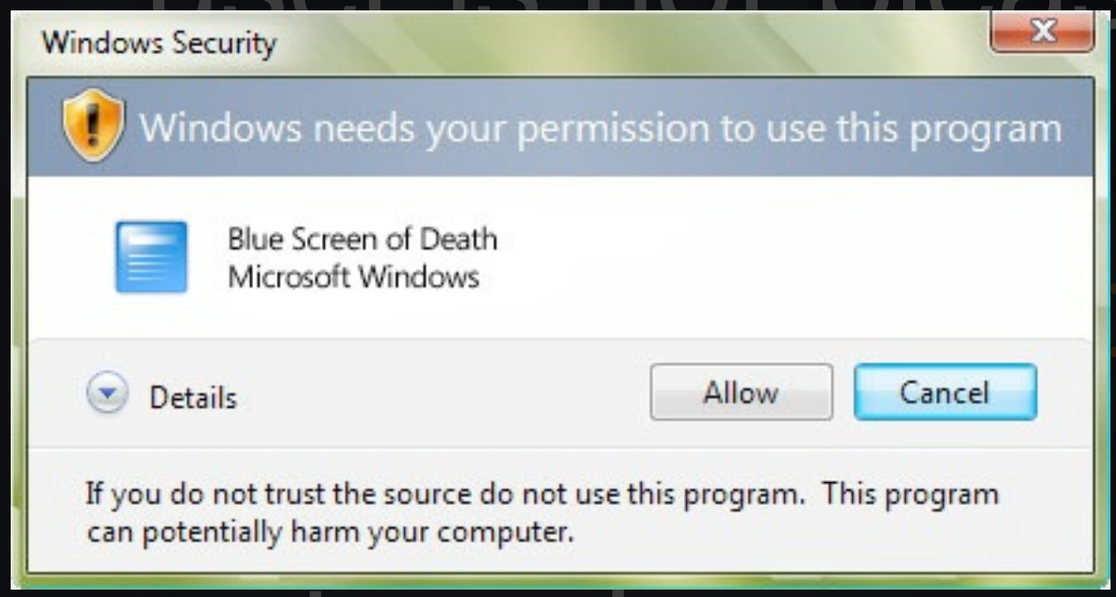
If a system's one-on-one interaction with its human user is not pleasant and facile, the resulting deficiency will poison the performance of the entire system, however fine that system might be in its other aspects



Jef Raskin

Usability Expert

If a system's one-on-one interaction with its human user is not pleasant and resulting poison the entire system, however fine that system might be in its other aspects



Donald Norman

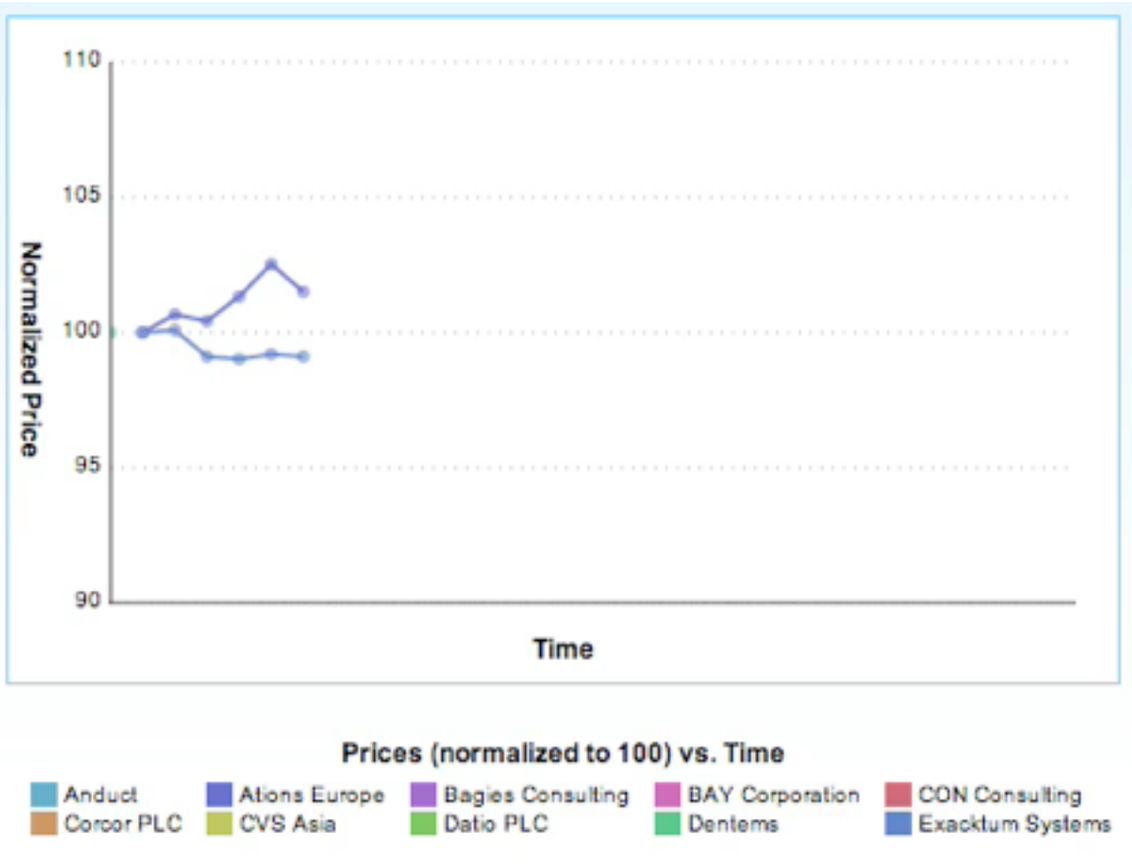
Dojo Charting



Dojo Charting

Namespace	Class
Summary	
dijit	dijit.ColorPalette
Grid showing various colors, so the user can pick a certain color	
dijit	dijit.Declaration
The Declaration widget allows a user to declare new widget classes directly from a snippet of markup.	
dijit	dijit.DialogUnderlay
the thing that grays out the screen behind the dialog Template has two divs; outer div is used for fade-in/fade-out, and also to hold background iframe. Inner div has opacity specified in CSS file.	
dijit	dijit.Dialog
Pops up a modal dialog window, blocking access to the screen and also graying out the screen Dialog is extended from ContentPane so it supports all the same parameters (href, etc.)	
dijit	dijit.TooltipDialog
Pops up a dialog that appears like a Tooltip	
dijit	dijit.Editor
A rich-text Editing widget

CSS Animations

transition-property - What property should animate, e.g., opacity.
transition-duration - How long the transition should last.
transition-timing-function - The timing function for the transition (e.g., linear vs. ease-in vs. a custom cubic bezier function).
transition - A shorthand for all three properties.

Here is a simple example:

```
div {
  opacity: 1;
  -webkit-transition: opacity 1s linear;
}

div:hover {
  opacity: 0;
}
```

This div will fade out when hovered over. In browsers that do not support this animation, there will be graceful degradation, as the div will simply fade out immediately.

Each of these properties supports a comma separated list of values, like CSS3 multiple backgrounds, which allows different transitions for individual properties to be described in a single style rule. Each value in the list corresponds to the value at that same position in the other properties.

For example:

```
div {
  -webkit-transition-property: opacity, left;
```

Kill Bill, Volume 1

Quentin Tarantino

Late!

publisher / label	Miramax
release date	Tuesday, April 13, 2004
stars	Uma Thurman Lucy Liu Daryl Hannah David Carradine Michael Madsen
theatrical debut	Friday, October 10, 2003
genres	Feature Film-action/Adventure
MPAA rating	R
format	DVD
features	Color
running time	111
retail price	$29.99
current value	$13.75
amazon® users	★★★★☆
u.p.c.	786936226997
amazon® #	B00005JMEW

Quentin Tarantino's *Kill Bill, Vol. 1* is trash for connoisseurs. From his opening gambit (including a "Shaw-Scope" logo and gaudy '70s-vintage "Our Feature Presentation" title card) to his cliffhanger finale (a teasing lead-in to 2004's Vol. 2), Tarantino pays loving tribute to grindhouse cinema, specifically the Hong Kong action flicks and spaghetti Westerns that fill his fervent brain--and this frequently breathtaking movie--with enough cinematic references and cleverly pilfered soundtrack cues to send cinephiles running for their reference books. Everything old is new again in Tarantino's humor-laced vision: he steals from the best while injecting his own oft-copied, never-duplicated style into what is, quite simply, a revenge flick.
